

Dear Parents;

Thank you for contacting Junior Academy of Victoria Park. We welcome your inquiry about our unique and exciting early preparatory program.

Our administration, teachers and staff are dedicated to offering the finest educational opportunities to children from infants through kindergarten. Our founding group brings to the Central Florida area a wealth of proven experience and outstanding reputations in early childhood academic preparation. We strive to foster in all children a love for learning that will enrich their education and lives.

We do this by ensuring that every student “learns how to learn.” Some children adapt easily from the concrete world of infants to the abstract tasks of processing speech, reading and numbers. Others need to be taught or they risk falling behind, far short of their potential.

Therefore, we don’t simply assess your child’s learning level and present suitable content. We assess his or her grasp of the learning process itself. And in a safe, fun and nurturing environment, we actually teach kids how to learn. They discover their own ability to actively convert spoken and written information into mental images which they can store, recall and build upon. These methods have been shown to expand learning horizons for students at every age and ability level beyond what parents and kids themselves expect.

At Junior Academy of Victoria Park, children discover a stimulating, well-rounded curriculum. Just as important, they are guided step by step in life skills such as socialization, creative and critical thinking and problem solving.

We invite you to visit and find out more about how we share *the skills-and the thrills-of learning* for the whole child, in these exciting, formative years!

Please call today to schedule a visit with us at your earliest convenience.

Sincerely,

Annette Alcott
